

Job Title: Demand and Production Analyst - CSD

Jones Soda Co. is a Seattle-based premium beverage company whose brands include Jones Soda, 24C, Jones Naturals, Jones Energy, Jones Organics and Whoopass. A leader in the premium soda category, Jones is known for its innovative labeling technique that incorporates always-changing photos sent in from consumers. Jones is renowned for its guerilla marketing techniques; popping up in creative places just to get soda into the hands of Jones fans. Jones is also known for creating unique flavors like Turkey & Gravy and Smoked Salmon along with all-time favorites, Blue Bubble Gum and Green Apple. Jones Soda is sold through beverage retailers and everywhere you'd never expect to find a soda.

The Demand and Production Analyst - CSD will be responsible primarily for day-to-day support of the production of Jones Soda CSD platform.

Specific duties will include the following:

- Collect and analyze sales forecast by plant location and customer to determine optimal inventory and production levels
- Coordinate sales promotions by plant location and customer to determine optimal inventory and production levels
- Research and evaluate capacity conditions that may effect Jones Soda's ability to produce product
- Assist in researching, evaluating and recommending enhancements to Jones Soda's production and procurement process
- Manage and oversee overall CSD supply chain operations, including purchasing and inventory of materials
- Manage and oversee overall CSD product policies, objectives, and initiatives within Jones Soda's production and sales systems
- Make recommendations to improve productivity, quality, and efficiency of operations
- Manage multiple functions within Jones Soda's and its partner's logistics systems, including the transportation of raw materials and/or finished goods, distribution of supplies as needed, and inventory control
- Enhance product workflow by analyzing and developing logistics plans that effect production, distribution, and inventory
- Create and review procedures for distribution and inventory management to maximize customer satisfaction and minimize cost
- Ensure proper utilization of production facilities with regard to deadlines and most efficient execution
- Analyze inventory levels, multiple facility production speeds, and product demand to determine the amount of finished product that will be produced at each facility
- Determine the best metrics to use to provide the most accurate representation of the forecast
- Work with multiple departments at partner facilities to determine optimal inventory levels
- Coordinate and resolve issues in partner systems regarding existing and new products
- Interact with customers to ensure that all requirements are being met, if and when needed
- Ongoing reporting and analysis of inventory status, quality measures, plant issues, resolution progress and cost variances
- Other projects and duties as required by the Operations team

Qualified candidates will have previous experience in a demand analyst, production forecasting, capacity planning or similar role.

Skills/Abilities Required:

- 3-5 years supply chain experience
- Familiarity with consumer packaged goods, food/beverage preferred
- Be exceptionally detail-oriented and organized
- Exhibit superior written and verbal communications skills
- Consistently and independently identify and resolve problems
- Have demonstrated experience with MS Office and Internet applications
- Show a thorough understanding of the company and its products

Preferred Qualifications:

- Bachelor's degree in an analytical discipline
- Prior food/beverage production experience

Candidates must be authorized to work in the US without sponsorship.

All applicants must submit a cover letter and resume, and should apply online via www.jonessoda.com or directly to jobs@jonessoda.com. The subject line of the email must read Demand and Production Analyst - CSD. No hard copy resumes accepted.
